

Day_12_Assignment

Batch – 3(SDET)

Himanshu Kumar Singh

Q-1) Create a program to store user input data into database using Scanner and JDBC?

Code:

```
package Day_12_Assignment;

import java.sql.*;

import java.util.Scanner;

public class Input_jdbc {

    static final String DB_URL =
"jdbc:mysql://localhost:3306/student_db";

    static final String USER = "root";

    static final String PASS = "Himanshu@1234";

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter Name: ");

        String name = sc.nextLine();

        System.out.print("Enter Age: ");

        int age = sc.nextInt();

        sc.nextLine(); // consume newline

        System.out.print("Enter Email: ");

        String email = sc.nextLine();
```

```

try {
    // Load Driver
    Class.forName("com.mysql.cj.jdbc.Driver");
    // Create Connection
    Connection con =
DriverManager.getConnection(DB_URL, USER, PASS);
    // SQL Query
    String query = "INSERT INTO students(name, age,
email) VALUES (?, ?, ?)";
    // Prepare Statement
    PreparedStatement ps =
con.prepareStatement(query);
    ps.setString(1, name);
    ps.setInt(2, age);
    ps.setString(3, email);
    // Execute
    int rows = ps.executeUpdate();
    if (rows > 0) {
        System.out.println(" Data inserted successfully!");
    }
    // Close
    ps.close();
    con.close();
} catch (Exception e) {
    e.printStackTrace();
}

```

```
        sc.close();
    }

}
```

Output:

Enter Name: Himanshu

Enter Age: 22

Enter Email: Himanshusingh26202@gmail.com

Data inserted successfully!

Q-2) Create a program to validate login using username & password from database?

Code:

```
package Day_12_Assignment;

import java.sql.*;
import java.util.Scanner;

public class Validate_login_inDB {

    static final String DB_URL =
"jdbc:mysql://localhost:3306/login_db";

    static final String USER = "root";
    static final String PASS = "Himanshu@1234";

    public static void main(String[] args) {
```

```

Scanner sc = new Scanner(System.in);
System.out.print("Enter Username: ");
String username = sc.nextLine();
System.out.print("Enter Password: ");
String password = sc.nextLine();
try {
    // Load Driver
    Class.forName("com.mysql.cj.jdbc.Driver");
    // Create Connection
    Connection con = DriverManager.getConnection(DB_URL,
USER, PASS);
    // Check user in DB
    String query = "SELECT * FROM users WHERE
username=? AND password=?";
    PreparedStatement ps = con.prepareStatement(query);
    ps.setString(1, username);
    ps.setString(2, password);
    ResultSet rs = ps.executeQuery();
    if (rs.next()) {
        System.out.println(" Login Successful!");
    } else {
        System.out.println(" Invalid Username or Password");
    }
    rs.close();
    ps.close();
    con.close();
} catch (Exception e) {

```

```

        e.printStackTrace();
    }
    sc.close();
}

}

```

Output:

Enter Username: admin

Enter Password: admin123

Login Successful!

Enter Username: adim

Enter Password: admin1234

Invalid Username or Password

Q-3) Write a program to insert multiple records using JDBC?

Code:

```

package Day_12_Assignment;

import java.sql.*;

import java.util.Scanner;

public class Multi_record_jdbc {

    static final String DB_URL =
"jdbc:mysql://localhost:3306/student_db";

    static final String USER = "root";

    static final String PASS = "Himanshu@1234";

```

```
public static void main(String[] args) {  
    Scanner sc = new Scanner(System.in);  
    try {  
  
        Class.forName("com.mysql.cj.jdbc.Driver");  
        Connection con = DriverManager.getConnection(DB_URL,  
USER, PASS);  
        String query = "INSERT INTO students(name, age, email)  
VALUES (?, ?, ?)";  
        PreparedStatement ps = con.prepareStatement(query);  
        System.out.print("How many records you want to insert? ");  
        int n = sc.nextInt();  
        sc.nextLine();  
        for (int i = 1; i <= n; i++) {  
            System.out.println("\nEnter details for Student " + i);  
            System.out.print("Name: ");  
            String name = sc.nextLine();  
            System.out.print("Age: ");  
            int age = sc.nextInt();  
            sc.nextLine();  
            System.out.print("Email: ");  
            String email = sc.nextLine();  
            // set values  
            ps.setString(1, name);  
            ps.setInt(2, age);  
            ps.setString(3, email);  
        }  
    }  
}
```

```
        // execute
        ps.executeUpdate();
    }
    System.out.println("\n All records inserted successfully!");
    ps.close();
    con.close();
} catch (Exception e) {
    e.printStackTrace();
}
sc.close();

}

}
```

Output:

How many records you want to insert? : 2

Enter details for Student 1

Name: Raaj

Age: 23

Email: raj@gmail.com

Enter details for Student 2

Name: Avi

Age: 23

Email: avi@gmail.com

Q-4) Create a program to display all records from students table?

Code:

```
package Day_12_Assignment;

import java.sql.*;

public class Display_rec_student {

    static final String DB_URL =
"jdbc:mysql://localhost:3306/student_db";

    static final String USER = "root";

    static final String PASS = "Himanshu@1234";

    public static void main(String[] args) {

        try {

            // Load Driver

            Class.forName("com.mysql.cj.jdbc.Driver");

            // Create Connection

            Connection con =
DriverManager.getConnection(DB_URL, USER, PASS);

            // SQL Query

            String query = "SELECT * FROM students";

            Statement st = con.createStatement();

            ResultSet rs = st.executeQuery(query);

            System.out.printf("%-4s %-10s %-5s %-20s\n", "ID",
"Name", "Age", "Email");

            while (rs.next()) {

                System.out.printf("%-4d %-10s %-5d %-20s\n",
rs.getInt("id"),
```

```
        rs.getString("name"),
        rs.getInt("age"),
        rs.getString("email")
    );
}
rs.close();
st.close();
con.close();
} catch (Exception e) {
    e.printStackTrace();
}

}

}
```

Output:

ID	Name	Age	Email
1	Himanshu	22	Himanshusingh26202@gmail.com
2	Raaj	23	raj@gmail.com
3	Avi	23	avi@gmail.com
4	Ravi	24	ravi@gmail.com
